

# Hydraulic Oil

“Zinc free & Chlorine Free”

Full line of hydraulic oils for a wide variety of industrial applications.

Hydraulic BL 32, 46, 68, 100

“Zinc free & Chlorine Free”

(Use for HDD Parts & Electronic Component Industry)

is designed to transfer power in applications where low ash content or a low environmental footprint are required. This oil performs well in the difficult conditions found in machining, metal extrusion, and die casting operations. It ensures excellent protection against wear and corrosion. The product has a strong anti-oxidation additive and anti-foam properties that allow for use in industrial applications. This oil contains premium additives for the highest level of performance. The Zinc free formulation is especially suitable for excavators or backhoes where environmental concerns are key.
