

Slideway ISO BL 100, 220

Rotary actuator slideway oil technology for heavy duty slideway and linear guides.

Slideway ISO BL 100, 220

is a breakthrough in technology for spindle lubrication of CNC machine tools that prevents wear and damage of the linear guide, center head, gearbox and XYZ axis, ensuring an excellent low wear rotational capability. This lubricant has increased oxidation and chemical stability. It prevents rust and corrosion effectively.
